

Mohammadamin Sadeghi

Backend Developer | Node.js & TypeScript

Tehran, Iran | +98 991 586 7462 | amin0xa1b@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Backend developer focused on Node.js, with hands-on experience designing and building RESTful APIs and scalable, modular services. Built several complete projects, including a gym invoicing platform that is live and deployed. I write clean, well-structured, maintainable code, and I follow good practices for API security and error handling to build stable, secure services. I enjoy learning new backend technologies and applying current best practices in software development.

Technical Skills

Backend	Node.js, Express.js, Nest.js, Fastify, RESTful API Design
Database	MongoDB, Mongoose ODM, Schema Design, CRUD Operations
Auth & Security	JWT Authentication, Session-Based Auth, RBAC, Password Hashing, Input Validation
Architecture & Patterns	MVC Architecture, Modular Architecture, Service/Repository Pattern, Singleton Pattern, Centralized Error Handling
Real-Time	WebSocket, Socket.io
Tools & Deployment	Git, GitHub, GitLab, Postman, Railway, Render
Other Skills	Progressive Web Apps (PWA), Regular Expressions (RegEx), Canvas API (JavaScript)

Projects

Gym Invoice System

Designed and built a full invoicing platform for a gym business; live and deployed.

- Built session-based authentication with role-based access control (RBAC)
- Implemented full CRUD operations with MongoDB, including input validation
- Used MVC architecture with centralized error handling

Live demo: [railway/Faktorito](#)

URL Shortener & Analytics

A URL shortening platform built with Fastify, with advanced analytics for tracking link activity.

- Built a URL shortening service with Fastify and MongoDB
- Built server-side rendered pages with EJS
- Implemented real-time features using Socket.IO

Live Demo: [railway/MakeItShorter](#)

Static File Manager

A lightweight file management tool for managing static files through a web interface.

- Designed a simple interface for quickly managing local project files
- Implemented file handling and server-side operations with Node.js
- Added support for managing static assets and browsing directory structures

Education

Associate Degree Student in Software Engineering — University of Applied Science and Technology

Personal Strengths

- Responsible and detail-oriented in project execution
- Keeps clear documentation and follows software engineering standards
- Team player with strong problem-solving skills and a good grasp of algorithms
- Committed to continuous learning and improving backend skills
- Uses AI tools purposefully as a coding assistant to work more efficiently
- Experience with the Canvas API in JavaScript for building interactive frontend elements
